CodeHS
AP Java School Memberships

Membership Overview

Schools using the CodeHS AP Java curriculum can purchase a year-long membership that includes everything teachers and students need for a successful course.

Once a school has purchased membership, the CodeHS Teacher Community Team will work with teachers to set up their accounts and open up full course access so they can prepare for the school year ahead. CodeHS highly recommends finalizing memberships by the start of the summer to secure adequate preparation time for teachers.

Why Teach AP Java with CodeHS?

Access to Web-Based Curriculum

- ❖ Membership includes access to our full year-long AP Java course for up to 30 students per section. The curriculum consists of short video tutorials, quizzes and assessments, sample problems and written programming exercises.
- ❖ The course is entirely web-based, with no additional software purchases or downloads needed.

Extensive Autograder

- ❖ All programming exercises are run through the CodeHS autograder, helping students to debug their own programs before needing help from a teacher.
- ❖ All student progress is saved to the site in real time, so progress through the curriculum is never lost.

AP Test Prep/Review Materials

- ❖ The CodeHS AP Java course contains extensive assessment and test prep materials, ensuring that all students are prepared to succeed in the AP exam.
- ❖ Assessments take the form of mid-lesson quizzes, end of unit exams and summative AP test prep materials

Suite of Teacher Tools and Resources

- ❖ Teachers receive access to extensive tools and resources to save them time.
- ❖ Tools include progress tracking, grading, custom content creation and management and more.
- ❖ Resources include sample solutions, classroom exercise handouts, lesson plans and more.

Teacher Support

- ❖ Dedicated Teacher Support
    - ➢ Every classroom that signs up for a CodeHS membership receives support from a dedicated CodeHS team member throughout the year.
    - ➢ Our Teacher Community Team assists with setup and start-of-year preparation, as well as ongoing support as students progress through the course.
- ❖ Tutor Support
    - ➢ As teachers work through our AP Java course themselves they receive feedback, grading and support from our online network of CodeHS tutors.

Technology Requirements

- ❖ The CodeHS program is entirely web-based, so no software is ever downloaded onto the computer and the program works on Macs and PCs (Chromebooks included).
- ❖ Specific requirements
    - ➢ One computer per student during class time
    - ➢ Up-to-date Chrome browser installed on every computer
    - ➢ Reliable internet connection
    - ➢ One pair of headphones per student

School Memberships and Pricing
